

Using Carausel to Make testimonials in the websites

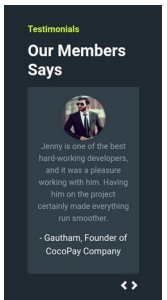

**1st: Copy code from getbootstrap.com/docs/4.5,
copy carausal code type “with indicator”**

1. Remove all `` from `` together `` from the top of code ok.
Due to it we can remove “dashes like in the pic”.

2. To align carousel image in the center remove “d-block” and “w-100” apply less width like “w-60” etc. From the class specified in the `` tag.
3. Remove `class="carousel-control-next"` and `class="carousel-control-prev"` from `<a/>` anchor tag exist in below like -

```
<a class="carousel-control-prev" href="#carouselExampleIndicators" role="button" data-slide=
  <span class="carousel-control-prev-icon" aria-hidden="true"></span>
  <span class="sr-only">Previous</span>
</a>
<a class="carousel-control-next" href="#carouselExampleIndicators" role="button" data-slide=
  <span class="carousel-control-next-icon" aria-hidden="true"></span>
  <span class="sr-only">Next</span>
</a>
</div>
```

- ✓ By Removing This Help us to move indicators at the bottom of testimonial card some thing like this
- ✓ here in the testimonail card a background color are set so you can use a class attribute inside the <div> tag of card ok see below, look div containing pre-defined class name “**carousel-inner**” act a main div that responsible to hold all testimonial cards, so I have, used “**testimonial-card-container**” by itself to apply background color in it.

```
<div class="carousel-inner testimonial-card-container"></div>
```

1. Put both anchor `<a>` tag inside a container element `div` so that you can proper align the indicators and apply padding for space. Look in the pic

Now You have successfully Built Testimonial Using Bootstrap Carausel.
